IDENTIFIERS *New York

ABSTRACT

This report is divided into two parts: headcount enrollment, and degrees granted at the institutions of higher education in New York. Each section contains a summary table for each type of institution followed by a table of statistics for each institution within that type. Summaries of statistics for all institutions of the State University of New York and for all state-operated institutions will be found at the beginning of each section. Enrollment figures are taken from the fall semester enrollment count. Degrees granted data represent all the degrees awarded during each year, from July through June. The data for this report are from the files of the central staff office of institutional research. The subdivisions for each section are: totals for the State University of New York; totals for state-operated institutions; university centers; university colleges; health sciences centers; specialized colleges; statutory colleges; associated colleges of upper New York; agricultural and technical colleges; and community colleges. INTRODUCTION

This report is a reissue of our Trends in Enrollment and Degrees Granted, 1948-1970 published two years ago. Official statistics for 1971 and 1972 have been added for each institution under the program of the State University of New York, so that the trends now cover a period from 1948 to 1972.

The report is divided into two sections, headcount enrollment and degrees granted. Each section contains a summary table for each type of institution followed by a table of statistics for each institution within that type. Summaries of statistics for all institutions of the State University of New York and for all State-operated institutions will be found at the beginning of each section. Enrollment figures are taken from the fall semester enrollment counts. Degrees granted data represent all the degrees awarded during each year, from July through June. The data for this report are from the files of the Central Staff Office of Institutional Research. Information concerning other vital aspects of the State University of New York is available on request in publications or other summaries prepared by the Office of Institutional Research.

The trends in enrollment and degrees shown in the tables of this report are the products of a unique past. They reflect planning and decisions very different from those which will be required in the future. Therefore, these trends should not be used for extrapolating future enrollments or degrees. But they are useful as indices of the creation of a new system of public post-secondary education designed to meet the needs and challenges perceived by the State University and the people of New York during the last two decades.

When the State University of New York was established in 1948 it consisted of 32 institutions of higher education with state appropriations for operations of 20 million dollars.¹ By 1972 the State University of New York had grown to include seventy-two institutions with state appropriations of over \$516 million dollars for operations in 1972-73. The goal is a quality university complex capable of providing post-secondary education on every level, community college through doctoral study and beyond for all New York State residents who can benefit from it.

Of the 32 original institutions only three have ceased to operate. These are Champlain College, Sampson College, and Middletown Collegiate Center. Known as the Associated Colleges of Upper New York, they were set up in temporary quarters and operated from 1948 to 1952 to meet the enrollment crises occasioned by returning World War II veterans who wished to undertake college study under the G.I. Bill.

The remaining 29 original institutions have expanded and developed within the State University. The four-year teacher training institutions have widened their scope and have become liberal arts colleges offering bachelors and masters degrees in a wide range of programs. One, the New York State College for Teachers at Albany, has developed into a University Center complete with a new campus, eight graduate and professional schools and a wide variety of undergraduate and graduate programs. During the twenty-four years covered in this report, the State University system has added three additional University Centers, four Health

² Budget Request for Operations, 1973-74 (Albany: State University of New York, 1972), p. 36.

Sciences Centers, four University Colleges, one Specialized College and thirty-one new Community Colleges. Approximately two-thirds of these new institutions have been established since 1960.

The community colleges represent the main thrust of the State's commitment to full educational opportunity for all its residents who can benefit from post-secondary study and training. By offering technical training and academic programs within easy commuting distance of most localities in New York State, these two-year colleges in the State University system are serving an expanding student population which seeks college training in order to meet the demands of our increasingly complex society. Programs are designed so that graduates of appropriate community college programs can transfer into the upper divisions of the four-year colleges and University Centers. The importance of this type of institution in the State University of New York system is demonstrated in figure 1.

FIGURE 1--PERCENT OF TOTAL ENROLLMENT
BY TYPE OF INSTITUTION, FALL 1972

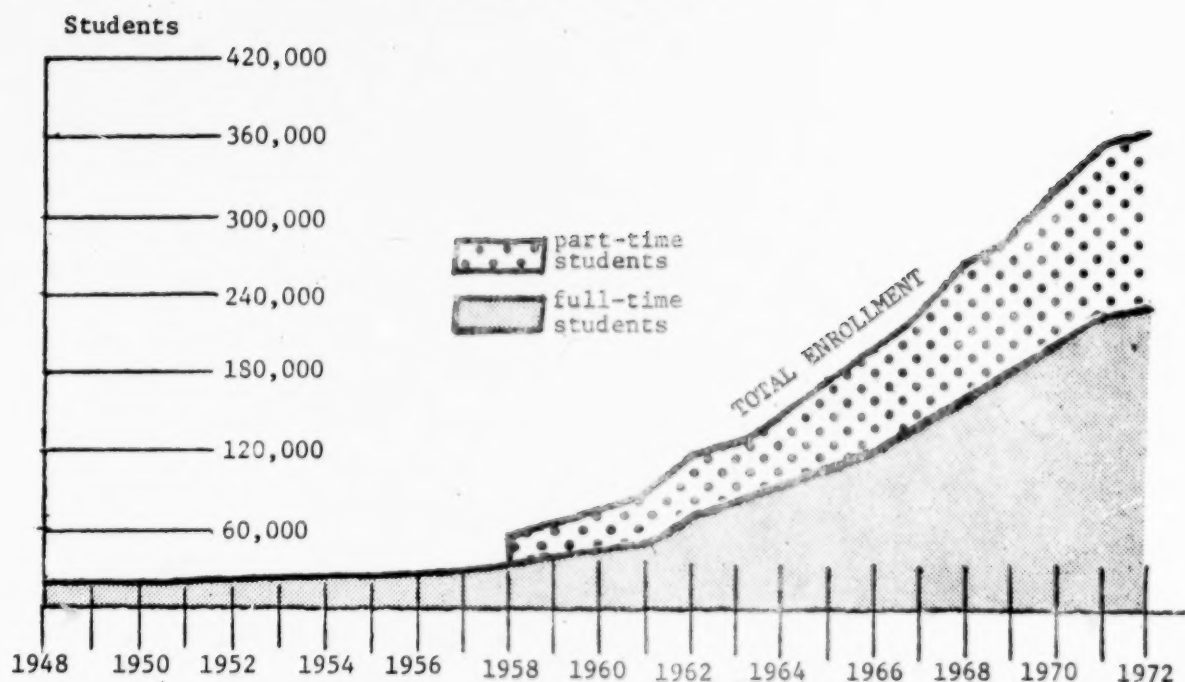

While the community colleges account for 54 percent of the Fall 1972 enrollment,

it should be noted that the State University system has also rapidly developed its facilities for more advanced college programs.

The transformation of the original teacher's colleges into liberal arts colleges has been an important part of that development. The change is not only one of kind, with much broader program offerings, but also one of capacity. In 1948 these colleges enrolled 9,293 students; in 1972 a total of 73,946 students were enrolled in our University colleges. Such growth has required a comparable expansion in faculty, programs, and facilities. The Agricultural and Technical Colleges have had a similar experience. Full-time enrollments have grown from 3,068 in 1948 to 18,278 in 1972, an increase of 496%. This increase has been accompanied by sweeping changes in curricula, faculty, and facilities in order to keep their programs relevant to the changing needs of our society. The University Centers and the Health Sciences Centers together account for 16 percent of the total 1972 fall enrollment. Considering the time, resources, and academic capabilities required to develop outstanding graduate and professional schools, this achievement, along with the expansion of the four-year colleges, the growth in the Agricultural and Technical Colleges, and the establishment of the community colleges, clearly demonstrates a University commitment to all levels of higher education.

The enrollment trends in this report provide enrollment figures for each institution from 1948 to 1972. The rate of growth varies from one institution to another and also varies over time. While complete data are not available for the calculation of total enrollments prior to 1958, the general trend for this earlier period is one of relative stability for the first five years followed by a period of steady but slow growth between 1953 and 1958. Figure 2 on the following page shows the total enrollment curve since 1958.

FIGURE 2--TRENDS IN CREDIT COURSE
ENROLLMENT 1948-1972

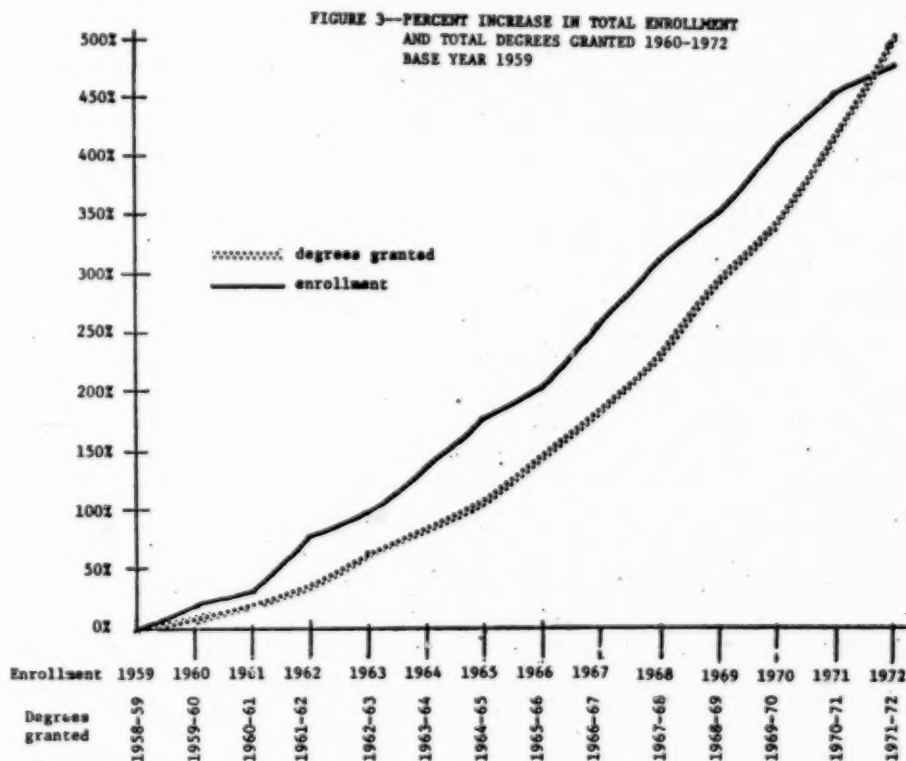

The rate of growth in student enrollment accelerated after 1961. In 1962 the University of Buffalo merged with State University of New York to become the University Center at Buffalo adding 14,371 students to the fall enrollment figures. This, along with a general increase in the rate of growth and the addition of fall enrollment figures for two new community colleges accounts for the sudden rise in the curve for 1962. After 1963 enrollment growth continued at an increased rate through 1968. The 1969 figures, while showing a considerable increase, produce a less steep curve but the rate of increase accelerates once again in 1970 only to begin to level off again in 1972. It is interesting to note that the number of part-time students has grown in approximately direct proportion to the number of full-time students in keeping with a University-wide emphasis on flexibility in programming and service to the widest possible student group.

The second part of this report is concerned with the numbers and kinds of degrees granted by each institution within the State University of New York.

Here again the overall trend is one of steady but slow growth in the number of degrees granted between 1949-50 and 1958-59. The few exceptions, where numbers of degrees granted actually decreased, may be attributed to the unusual influence of the Korean War. Between 1959-60 and 1971-72 there is a much greater increase each year, with the most dramatic increases in associate degrees and doctoral degrees. The number of associate degrees rose from 4,780 in 1959-60 to 30,545 in 1971-72. Doctoral degrees jumped from 98 in 1959-60 to 671 granted in 1971-72.

Generally the increase in the number of degrees granted has paralleled the increase in enrollment if allowances are made for the time lapse between entering students and the completion of degree requirements. Until 1970, whenever the rate of increase in enrollment remains constant for a few years, the curves for enrollment and degrees granted become roughly parallel as seen in Figure 3 below.

After 1970, there is a leveling off in the percent increase in enrollments while the percent increase in degrees granted continues to rise as those students who produced the rising enrollment curves of 1967 to 1970 complete their programs.

Trends in student enrollment and degrees granted are only a part of the total State University of New York experience in the last twenty-four years. In this report there is no indication of the vast changes in faculties, curriculums, libraries, physical plants, or other facilities. Nor is there any mention of the problems, frustrations and difficulties experienced by the University community during these years. Still, a sense of our development emerges from these data. State University is enrolling more students and granting more degrees each year. The extent of these increases and where and when they took place from 1948 to 1972 are the subject of this report.
